ENVIRONMENTAL

August 26, 1987

TO: Tom Work, Region III Supervisor  
Environmental Response Division

FROM: Andrew Hogarth, Chief, Remedial Action Section  
Environmental Response Division

SUBJECT: Chrysler Chemical Trenton Plant Work Plan

The week of August 11, 1987, we received copies of work plans for remedial activities and investigations at the Chrysler Chemical Plant site in Trenton. Sue Henry has informed us that Gary Guenther will be the contact person for any calls that may come in after a Chrysler press release expected August 27th that will be announcing their actions. Our staff will be passing on any comments we may have on the work plans directly to Mike Czuprenski in Northville and have kept him informed of these recent developments. We assume your staff will develop and communicate the Department position on the proposed actions to Chrysler. Please keep us informed of any new information or progress that develops during Chrysler's site activities.
